"What happened to the keyboard?"
Sue Ward

I am something of a computer nerd and most of my friends are aware of this, so when something goes wrong with their hard or software or they have queries they usually call me. In this instance, my friend had been given a very old and, in my opinion, fairly useless computer. I will not

mention the name of this piece of 'equipment' for fear of offending any of those sorry souls who still possess one. I'm only surprised that they can still get the coal with which to fuel the double-disk driven fossil!

It was not unexpected to discover that it didn't work, what did cause my eyebrows to raise was that she found someone who could repair it. I agreed to accompany her to the shop to translate any gobbledegook

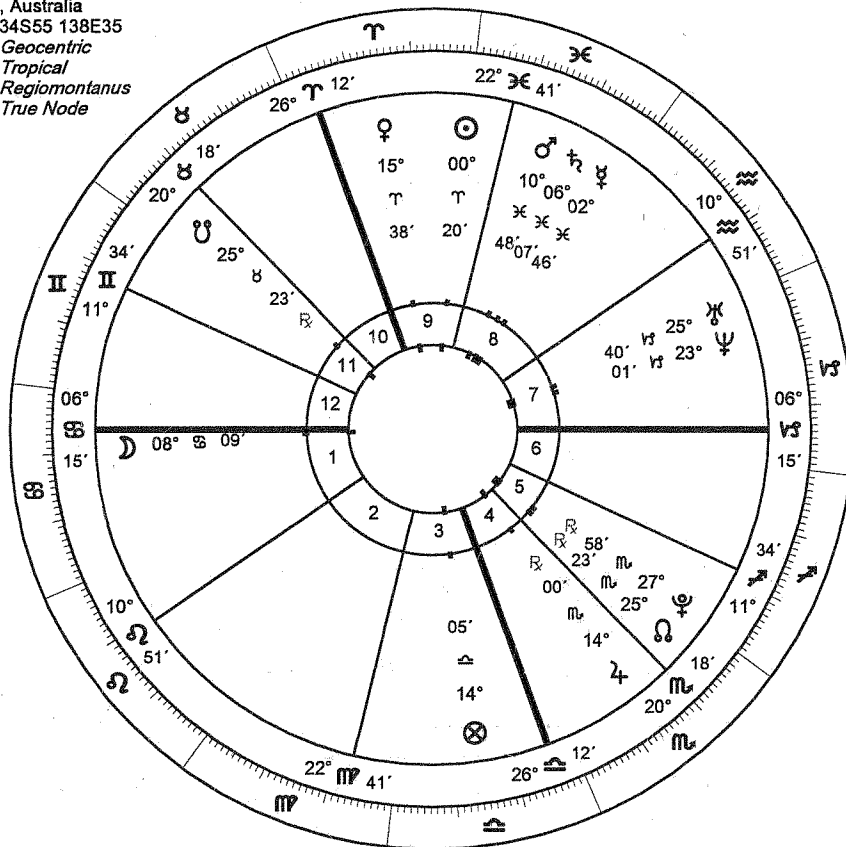

revealing of a mystery and also for success. I don't often see this aspect, but I like it very much when I do.

Some confirmations for location are that the D is in the 3rd of the local area, although ♀ is in the 12th of distance; taking ♀ or ♀ for the keyboard, ? describes a location east by north of her home. The repairers shop was in a village a few miles exactly east and north of her.

She telephoned the shop the next day and discovered that they had forgotten to give her the keyboard, she collected it the morning after that. You might be interested to know that she is now the proud owner of a Pentium multimedia kit and that I haven't seen much of her since.

Will I go to Greece?
Anne Elliott

When I read the flier advertising the *Kos Summer School of Astrology*, I felt a strong urge to go, but it was a long way to go and an expensive trip. I knew no-one else going, and my husband wasn't keen on

accompanying me, this meant that I would have to travel along.

The school would be run by Michael Baigent, Nicholas Campion & Dianne Binnington. I had read Michael's and Nick's books and enjoyed their work, but didn't know if it would be enough to justify the trip. But the urge was so strong I felt I should consider it seriously.

The chart is radical because it violates none of the warnings against judgment and the planetary hour ruler ♃ also rules the ascendant.

I am represented by the ♃ in ♌ ruling the ♌ Ascendant which also happens to be my natal ☉ sign.

The 9th house rules both overseas travel and higher learning and its ruler ♃ in ♌ which is ♀ in the 4th house forms a mutually applying Δ to the 1st house ruler, the ♃. By itself, this aspect is a strong "yes", reinforced by ♃'s reception of the ♃ by exaltation. However, before the ♃ can reach her Δ of ♃, she aspects ☽, ruler of the ♎ Midheaven and ♌ 5th. If ☽ afflicted the ♃, this would be an example of prohibition (C.A. page 110), denying a favourable outcome. Fortunately, they form a favourable Δ, ☽ receives the ♃ by triplicity, and ☽ and ♃ are in mutual reception by sign, reinforcing the Δ's positive influence.

The ☉ is in exaltation and triplicity and ♀ is in detriment and peregrine, giving a mixed message about the value of the school. Could it be all glory and no substance? Perhaps students wouldn't relate well.

The ♃ has passed a Δ to ♀ and ♃ which I took to be hearing about the school and finding that my business was organized enough to cope with me having time away, and that it could be afforded.

The ♃ next Δ ☽ in ♎ in the 8th house and then ♃ showing me taking the action (booking and paying with a credit card) and going. ☽ and ♃ are in mutual reception, and the final aspect of the ♃ is a Δ to ♀ (generally thought of as bringing something to light).

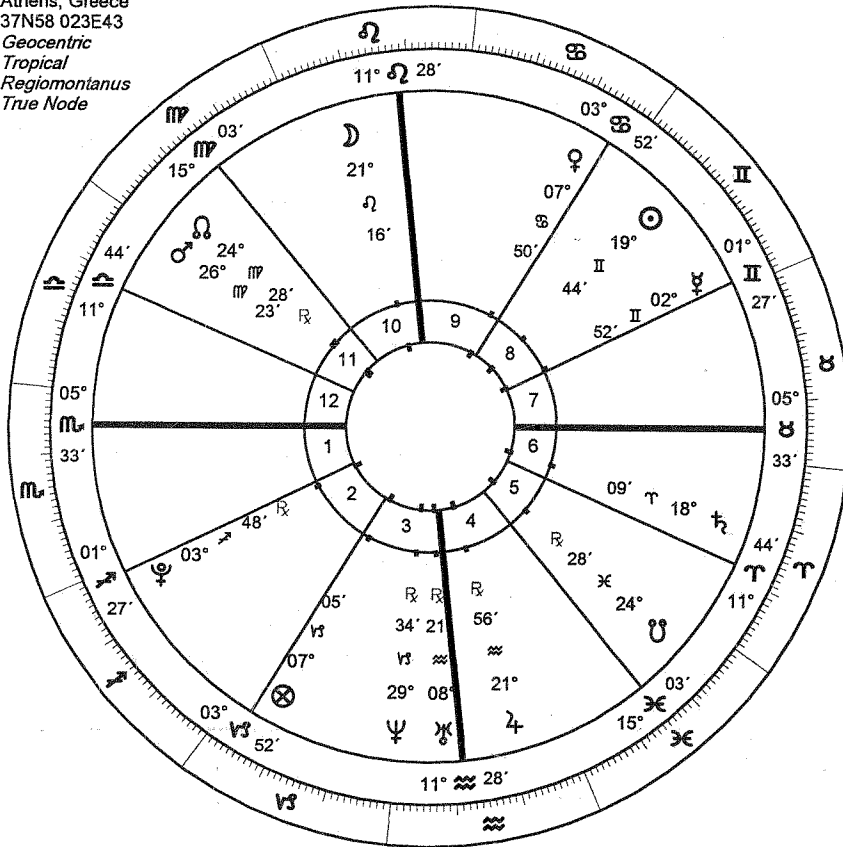

I felt all this was positive. So I booked the next day, convinced my husband to come

too, and went the following month. We had a great time. I gained a whole new attitude to astrology and a great respect for history. The school was full of information which was well taught. We had a minor brush with the law and an earthquake at sea on one of our trips. No harm came to us, we made some lasting friendships and I met my time twin.

And the ♃ ♀ ? The ♃ and ♃ were mutually applying and the trip came very fast. We flew out only 3 ½ weeks after the question.

Should I buy the OTE Shares?
Despina Giannakopoulou

Shares of the OTE, the National Organization of Telecommunications of Greece, were about to be traded on the Greek stock exchange, and the querent wanted to know whether to invest in them.

The ruler of the planetary hour, ♀, and the ascendant, ♊, agree in nature: both are cold and moist.

The querent is shown by the ♊ Ascendant and by the 1st house ruler ♂ in ♃ in the 11th house of hopes and wishes, reflecting his hope that the shares would earn a profit. His cosignificator ☾ is in ♋ in

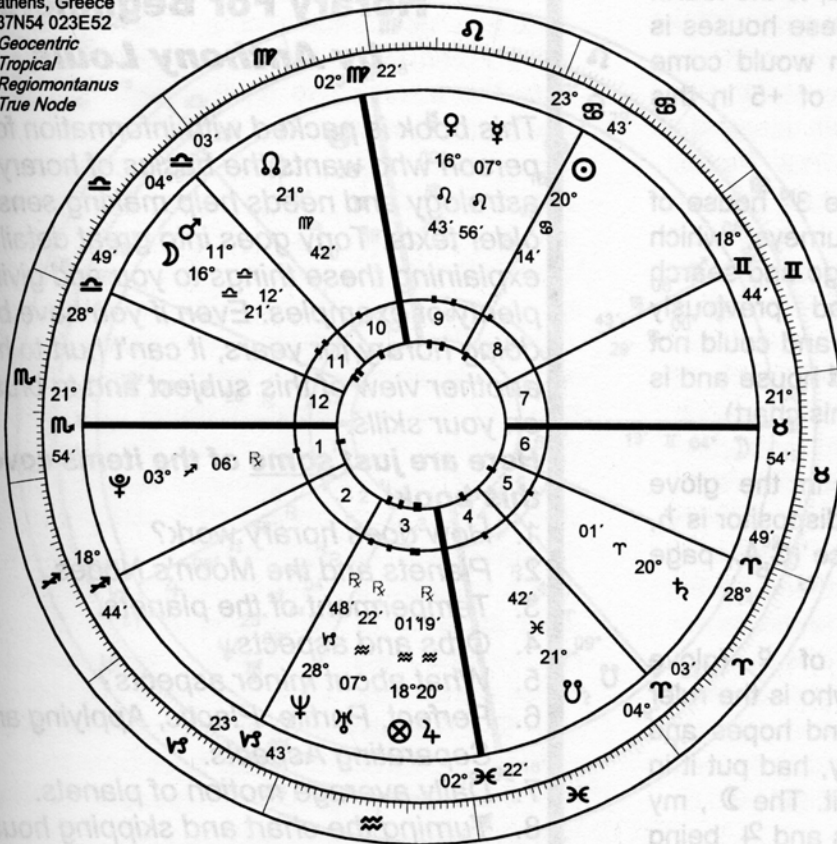

the 10th. As ruler of the ♃ 5th house of speculation, ♃ in ♋ in the 4th rules the transaction. ♃ changed direction only 12 hours before the question, so he is both R, and stationary, suggesting that the investment, like the planet, is going nowhere.

There is no aspect between the 1st house ruler ♂ and 5th house ruler ♃ that would bring the transaction about, nor are they linked by mutual reception, collection of light

of translation of light. The cosignificator ♃ and the 5th ruler ♃ form an ♂, showing that the querent will not buy the shares, and the ♂ is almost exact (less than 1 degree from perfection), angular and mutually applying, all of which bring the matter speedily to an end (C.A. page 164). That same night the querent decided not to buy the shares.

**Where is the computer which controls the gate?
 Despina Giannakopoulou**

Usually I keep the computer in a drawer next to the telephone. Last time I had used the computer was two days before. As I am a ♎, when I saw ♎ rising I considered the chart valid.

In this chart, I am ruled by ♄, as ruler of the 1st house. ♄ in this chart is peregrine, in detriment and has a score of +3. It is also in mutual reception with ♄ by sign and exaltation.

The computer I am asking about can be represented in two different ways. Lilly

says that moveable possessions belong to the second house and if mislaid, to the fourth house. The ruler of both of these houses is ♃ R_x indicating that the item would come back to me. ♃ has a score of +5 in this chart.

Now ♃ is posited in the 3rd house of communication and small journeys, which suggested to me that I should go and search in my car, although I had previously searched the whole apartment and could not find it. (♃ is the ruler of the 3rd house and is in mutual reception with ♂ in this chart)

I found the computer in the glove compartment of the car. ♃ R_x dispositor is ♃, suggesting a dark or ashy place (C.A., page 57) in the car.

♃ is in the terms of ♀ (glove department) in the face of ♀, who is the ruler of the 11th house of friends and hopes and wishes. In fact my friend Mary, had put it in there and we all forgot about it. The ☽, my co-ruler will Δ ♃ in 4 degrees and ♃ being R_x tends to speed things up.

This chart includes a case of frustration (both personally and astrologically). Before the aspect of ♃ × ♃ takes place it gets frustrated by the ♂ of the ☽ to ♃.

Concerning Lilly's page references about R_x signifiers I found the following references in *Christian Astrology*: Page 160, If the lord of the Asc be in a moveable sign and R_x, and the lord of the 4th also, the ship will return again..... Page 162: If ☽ joyned to infortunes, viz. ♃ or ♂ or ☿, or to a R_x planet, he shall be found or come back again. Page 406: but if either his signifier be R_x, or ☽ joyned to a R_x Planet, and behold the Asc, it imports his sudden return when not expected..... Page 468: ...thirdly, ♀, Lord of the thing R_x, importing a returning of the thing again
© Despina Giannakopoulou, 1998

Horary For Beginners *by Anthony Louis*

This book is packed with information for the person who wants the basics of horary astrology and needs help making sense of the older texts. Tony goes into great detail explaining these things to you and giving plenty of examples. Even if you have been doing horary for years, it can't hurt to have another view of this subject and to brush up on your skills.

Here are just some of the items covered in this book:

1. *How does horary work?*
2. *Planets and the Moon's Nodes.*
3. *Temperment of the planets.*
4. *Orbs and aspects.*
5. *What about minor aspects?*
6. *Perfect, Partile, Plactic, Applying and Separating Aspects.*
7. *Daily average motion of planets.*
8. *Turning the chart and skipping houses.*
9. *House systems, planets and Rulerships.*
10. *Is the chart valid? And other considerations.*
11. *Seeking Perfection in the chart.*
12. *Planetary Strenths.*
13. *Essential Dignities.*
14. *Almutens, their meaning and table.*
15. *Antiscions and Contrantiscions.*
16. *Beholding and inconjunct signs.*
17. *Solar and Lunar halves of the Zodiac.*
18. *Chaldean Faces of the Signs.*
19. *Table of Essential Dignities according to Ptolemy used by Lilly.*
20. *Part of fortune.*
21. *Accidental Debilities and dignities.*
22. *Direct in motion, stationary in motion, retrograde in motion.*
23. *Occidental and oriental of the Sun.*
24. *Plenty of example charts to illustrate the methods being shown.*
